## EXPERIENCE

---

### Amerhart

Green Bay, WI

#### *Application Developer*

May 2020 – Current

- API development and testing using Web API, .NET, and C# to build new and existing features using Azure.
- Create unit test projects for C# solutions and maintain codebase to ensure new changes are functional across libraries (Global Services, Internal Services, Scheduled Tasks, etc.).
- Assist in analysis of interacting systems with senior architect to ensure code changes made to one system will not impact other systems.
- Develop a SPA using .NET and React JS that provides analytics and transactional data for the sales team named SIP (Sales Information Portal).
- Develop and maintain solutions in building or enhancing business capabilities and eliminating any redundancies.
- Create reusable UI components, implement new designs and features with Redux and Webpack using React.
- Perform deployment activities (publishing profiles and web deployment in Azure) related to application implementation and upgrades.
- Monitor incoming IT support tickets from company branches to assess user feedback to fix, update, and troubleshoot various applications.
- Import and validate customer data, product/item entities, and other excel file resources (Episerver and inRiver).
- Install software and extensions across corporate computers.

#### *IT Intern*

Nov. 2018 – May 2020

- ERP data cleanup - Identify data that needs to be cleansed using MS SQL Server.
- Migration of existing HTML pages on Amerhart.com to new B2B platform.
- Create packages in data management solution using SSIS for email notifications (using SendGrid) and data cleansing.

**FedEx Ground***Package Handler (Seasonal)*

Ashwaubenon, WI

June 2018 – Aug. 2018

- Loading/Unloading packages and parcels, reading and comprehending labels to ensure proper processing, and communicating efficiently with fellow workers.

---
